- + **Battery:** battery housing, cooling circuit of the battery, pressure compensation elements, electrical connections (e.g. signal or COM plugs),...
- + **E-machine:** Inverter room, drying room, oil room, electrical connections and connectors

ACCESSORIES

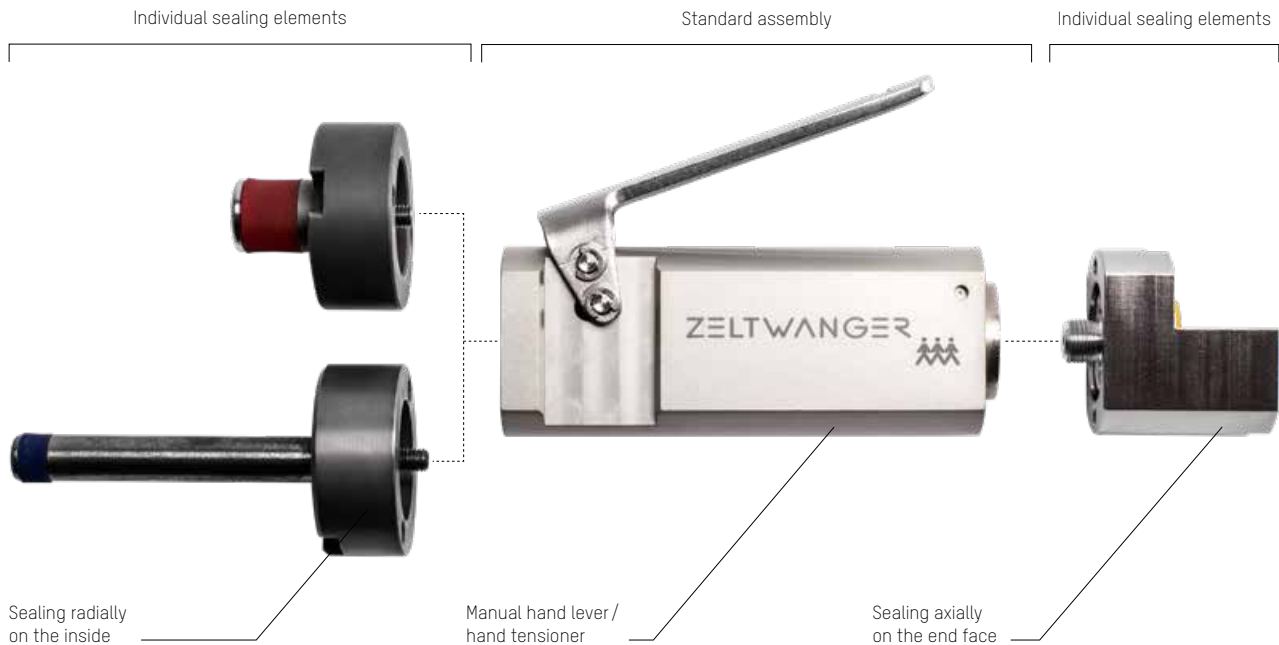

- + Tool trolley
- + Customized adaptation
- + Adapter trays

BENEFITS

- + Holistic system provider for your leak test
- + Technical advice / feasibility, adaptation including test device, commissioning, service
- + In-house development and production
- + Technical design and consulting
- + All common plugs for e-mobility are available

Example representation of a hand tensioner with selected customer-specific sealing elements

Product features:

- Manual operation
- Easy handling
- Robust Al housing / high-quality materials
- Conspicuous appearance for easy identification on the device under test
- Ergonomic design
- Easy seal change
- Standardized basic structure and application-specific adaptation
- Long service life
- Short delivery times

Actuation options:

- Manual (hand lever / tension lever)
- Automation possible

Connection type:

- + Application-specific contours sealing externally / internally
- + Sealing radially on the outside / inside
- + Axially sealing

How to use:

- + Measuring
- + Sealing
- + Filling

Compatible with the complete ZED device family

ZEDflex with ZEDcontrol
